DETAILED ACTION

1. Claims 1-11 and 14 in condition for allowance.

2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose alone or in combination the following:

Claim 1, short brake circuit includes a first brake control circuit that outputs a signal to the drive circuit so as to cause the drive circuit to turn off the first transistor and to turn on the second transistor in accordance with a brake operation instruction signal, and a second brake control circuit connected to the base of the first transistor so as to cause the first transistor to be turned off by drawing current from the base of the first transistor in accordance with the brake operation instruction signal independent of the first brake control circuit

Claim 9, step of forcing the first transistor to be turned OFF is performed by turning ON a switching element that is divided between the connection point between the first and second transistors and the motor and a base of the first transistor in accordance with the brake operation instruction signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
